1998

DM je izabran u zvanje vanrednog profesora na Univerzitetu u Sarajevu.

A. de Bohan, Ph. Antoine, D. B. Milošević, and B. Piraux, "Phase-dependent harmonic emission with ultrashort laser pulses", *Phys. Rev. Lett.* **81**, 1837 (1998).

Ovaj rad je rezultat naučne saradnje sa kolegama iz Laboratoire de Physique Atomique et Moléculaire Université Catholique de Louvain, Belgium. Dio je doktorske teze Francuskinje Armelle de Bohan. To je prvi rad o generaciji viših harmonika pomoću ultrakratkog laserskog polja (tzv. few-cycle laser pulse) koji je otvorio put potpuno novoj oblasti nauke – attoscience. Koristi se i termin attophysics (atofizika; atto = 10^{-18} ; uporediti sa terminom femtohemija (femto = 10^{-15}) – A. Zewail je dobio Nobelovu nagradu za hemiju 1999. godine za otkrića u femtohemiji).

D. B. Milošević and A. F. Starace, "Static-electric-field-induced, high-energy plateau for scattered x-ray photons in laser-assisted, x-ray-atom scattering", *Phys. Rev. Lett.* **81**, 5097 (1998).

Ovaj rad je objavljen tokom postdokorskog boravka DM na Department of Physics and Astronomy, The University of Nebraska, Lincoln, USA. Rad je privukao pažnju naučne javnosti. Radilo se o novom metodu generisanja koherentnih X-zraka sa mogućnošću primjene u više oblasti nauke – npr. za holografiju x-zraka u hemiji, biologiji i medicini. Komentar o tome pod naslovom: "Milosevic, Starace propose novel source of coherent x-rays", je objavljen u "Arts & Science Columns", the University of Nebraska, Arts & Sciences Alumni Association, Fall 1999.

1999

D. B. Milošević and A. F. Starace, "Magnetic-field-induced intensity revivals in harmonic generation", *Phys. Rev. Lett.* **82**, 2653 (1999).

Ovo je najznačajniji rad DM. Rezultat je višegodišnje saradnje veće grupe naučnika. Eksperimentalno su potvrđeni raniji teorijski rezultati DM koji pokazuju da je Feynmanov metod prirodan okvir za analizu atomskih procesa u jakom laserskom polju. Rad je privukao veliku pažnju javnosti. Iz-

abran je za novost sedmice u časopisu Science: Charles Seife, "Quantum physics: loopy electron model solves ion mystery", in *News of the Week*, Science **292** (5518), 823–825 (2001), a komentar o tom radu je objavljen i u dnevnoj štampi: A. 2004

Odlukom Senata Univerziteta u Sarajevu knjiga DM izabrana za univerzitetski udžbenik: D. Milošević, "Relativistička kvantna mehanika", Univerzitetski udžbenik, bosniaARS, Tuzla (2005) [ISBN: 995874620-4]

Ovo je izuzetno značajan rad sa fundamentalnog stanovišta. Eksperiment sa interferencijom jednog elektrona na dvije prostorne pukotine je povezan sa misterijama i paradoksima u kvantnoj mehanici. Prema izboru časopisa *Physics World* i *New York Times* taj eksperiment je izabran kao najljepši u naučni eksperiment u istoriji. Novi eksperiment čiji je koautor DM predstavlja analog tog eksperimenta, ali u vremenu, a ne u prostoru. Na internetu se može naći na hiljade stranica o tome ako se unese npr. "Double Slit Sarajevo". Ovdje navodimo slijedeći članak: "New look for classic experiment" in March 2005 issue of *Physics World*, by Peter Rodgers, Editor of *Physics World*; vidjeti i "Physicsweb", March 2 (2005)

Izbor kalibracije (gaugea) elektromagnetnog polja već dugo predstavlja zagonetku i problem za naučnike. Ovaj rad doprinosi rasvjetljenju tog problema za slučaj interakcije atoma sa laserskim poljem. Rad je citiran neočekivano veliki broj puta za kratko vrijeme.

Milošević, "Simulation of above-threshold ionization experiments with noble gases using the strong-field approximation", na 14th Central European Workshop on Quantum Optics (CEWQO 2007), Palermo, Italy, June 1–5 (2007).

Phys.* **41**, 201004, 1–5 (2008) (Fast Track Communication)

U ovom radu je upoređena simulacija spektara molekula jonizovanih jakim laserskim poljem sa eksperimentalnim rezultatima dobijenim u Japanu.

Rezultati su odmah zapaženi u naučnoj javnosti i ovaj rad je izabran u "IOP Select" kao rad koji predstavlja "Substantial advances or significant breakthroughs, a high degree of novelty, and significant impact on future research" u časopisu *Journal of Physics B* (vidjeti: <http://Select.iop.org>).

19. septembra 2008. godine DM je izabran za dopisnog člana Akademije nauka i umjetnosti Bosne i Hercegovine.

2009

M. Okunishi, R. Itaya, K. Shimada, G. Prümper, K. Ueda, M. Busuladžić, A. Gazibegović-Busuladžić, D. B. Milošević, and W. Becker, "Two-source double-slit interference in angle-resolved high-energy above-threshold ionization spectra of diatoms", *Phys. Rev. Lett.* **103**, 043001 (2009).

Eksperimenti interferencije sa dvije pukotine su od fundamentalnog značaja za objašnjenje fizikalnih pojava. U ovom radu je otkriven i objašnjen novi tip interferencije koji se javlja pri jonizaciji dvoatomskih molekula. Karakterističan je po tome što postoje dva izvora elektrona (atomske centri dvoatomske molekule) i dvije "pukotine" (predstavljene ponovo sa dva atomska centra na kojima se jonizovani elektron rasijava). Rad je nastao u saradnji sa eksperimentalnom istraživačkom grupom iz Japana. Grupa DM u Sarajevu je simulirala i objasnila spektre elektrona detektovanih pri jonizaciji tih molekula jakim laserskim poljem.

Senat Univerziteta u Sarajevu je prof. dr. Dejanu Miloševiću dodijelio nagradu za najuspješnijeg profesora u akademskoj 2008/2009. godini.

2010

A. Gazibegović-Busuladžić, D. B. Milošević, W. Becker, B. Bergues, H. Hultgren, and I. Yu. Kiyani, "Electron rescattering in above-threshold photodetachment of negative ions", *Phys. Rev. Lett.* **104**, 103004 (2010).

U ovom radu su prvi puta eksperimentalno zapaženi elektroni koji su se odvojili od negativnih jona broma pod djelovanjem jakog laserskog polja i zatim rasijali na matičnom atomu prije nego što su registrovani detektorom. Simulacija eksperimenta pomoću teorije odvajanja iznad praga višeg reda, koja je razvijena u istraživačkoj grupi prof. Miloševića u potpunosti objašnjava eksperimentalne rezultate. Rad je posebno značajan jer je otkriven tzv. "rescattering" (naknadno rasijanje) mehanizam kod negativnih jona.

DM je bio mentor za tri uspješno odbranjena doktorata na Odsjeku za fiziku Prirodno-matematičkog fakulteta Univerziteta u Sarajevu (Mustafa Busuladžić, Azra Gazibegović-Busuladžić i Senad Odžak).
